Authorized to work in the Philippines · Available as contractor or via employer of record · No visa sponsorship needed (remote)

SUMMARY

Full stack software engineer with 2+ years building and supporting production systems in Java/Spring Boot, Vue.js and AWS at Samsung R&D and an airline ticketing platform. Built AI-assisted automation that cut support-ticket resolution time by up to 50%. Since Sep 2026 also owns quarterly planning and new-hire onboarding, and works as a mentor-guided technical project manager / product owner across three teams. IEEE-published researcher with strong written English. Seeking a fully remote, product-focused role.

SKILLS

Languages: Java, JavaScript, Python, C#
Frameworks: Spring Boot, Vue.js, React, Node.js, .NET
Data: MySQL, DynamoDB, Aurora RDS, SQLite
Cloud: AWS (Lambda, SQS, KMS, S3, Athena)
AI-assisted development: Claude, Cline: prompt design, workflow automation, code review
Practices & tools: REST APIs, access control (PBAC), Agile/Scrum, Git/GitHub, Postman, Jira, Confluence
Delivery & leadership: Quarterly/feature planning, cross-team coordination, status reporting, mentoring, documentation

EXPERIENCE

Samsung R&D Philippines – Full Stack Software Engineer *Mar 2025 – Present*

- Built carrier certificate management and policy-based access control (PBAC) for an admin portal managing thousands of devices: 14 policies, 76 permissible actions (Spring Boot, Vue.js, AWS Lambda/SQS/KMS)
- Automated IMEI-encryption API calls, SQL query generation and log analysis with Cline-assisted scripts, cutting customer-ticket (VOC) resolution time by up to 50% and endpoint testing time from 30 to 10 minutes
- Since Sep 2026, own quarterly planning, feature scoping and breakdown, and onboarding of 2 new hires, inherited from a departed senior engineer
- Since Sep 2026, mentor-guided technical project manager / product owner on a live project: run meetings, present reports, coordinate the data, server and app teams (3 members each), and document meetings, reports and to-dos in the team wiki
- Resolved ~4 customer-reported (VOC) tickets per sprint through production debugging and direct database intervention; use Samsung's internal AI assistant (Gauss) for code review, documentation and SDLC task automation

Aeronology Philippines Inc – Junior Software Engineer *Dec 2023 – Jan 2025*

- Delivered the South African Airlines integration into the ticketing platform, extending access to international routes
- Triaged and resolved production incidents through targeted hotfixes, reducing downtime and strengthening system reliability
- Strengthened backend code quality and documentation, easing maintenance and speeding up team development

PROJECTS

Retail Analytics Pipeline | *Python, Claude* *Apr 2026*

- Designed an ETL pipeline turning raw ERP CSV exports into Excel KPI reports for 15 retail stores across two brands

Staff Scheduling Application | *Node.js, SQLite, REST API, Claude* *Apr 2026*

- Built a scheduling app with an auto-fill algorithm, REST API and browser frontend for store shifts and staff assignments

EDUCATION

University of the Philippines Los Baños – BS Computer Science *2019 – 2023*
Cum Laude · GWA 1.61 (1.0 = highest) · DOST-SEI MERIT Scholar

PUBLICATION

A Novel Automatic Definition Selector and Scoring Scheme for the Identification of Filipino Metaphors
Ocampo & Clariño, ICCCI 2024 (IEEE). Primary author; presented orally. DOI: 10.1109/ICCCI62159.2024.10674510
