Authorized to work in the Philippines · Available as contractor or via employer of record · No visa sponsorship needed (remote)

PROFESSIONAL SUMMARY

Full stack software engineer with 2+ years building and supporting production systems in Java/Spring Boot, Vue.js and AWS, currently at Samsung R&D and previously on an airline ticketing platform. Builds features across the frontend and backend, handles client and stakeholder requests, and regularly improves manual workflows with AI-assisted automation. Also owns quarterly planning and new-hire onboarding, and works as an associate technical PM / product owner across teams. Strong written English; seeking a fully remote, product-focused role.

EDUCATION

University of the Philippines Los Baños *2019 – 2023*
BS Computer Science · Cum Laude · GWA 1.61 (1.0 = highest) · DOST-SEI MERIT Scholarship Grantee

PROFESSIONAL EXPERIENCE

Samsung R&D Philippines *2025 – Present*
Full Stack Software Engineer · Philippines

- Leads the main task force on a carrier services platform, building the frontend for its new pages in Vue.js and a per-device history log in Java/Spring Boot on AWS
- Builds and maintains carrier certificate management and access control for the admin portal
- Handles client and stakeholder requests through production debugging and direct database fixes
- Regularly analyzes manual team workflows for slow or repetitive steps and improves them with AI-assisted automation
- Owns quarterly planning, scoping new features and breaking them down into tasks
- Onboards and teaches new hires joining the team
- Works as associate technical PM / product owner on a live project: sets up meetings, prepares and presents reports, and coordinates work across teams
- Writes internal wiki documentation for meetings, reports and to-dos, closing recurring knowledge gaps in the team
- Uses Samsung's internal AI assistant (Gauss) for code review, documentation and SDLC task automation

Aeronology Philippines Inc *2023 – 2025*
Junior Software Engineer · Philippines

- Built and extended booking and ticketing features on an airline ticketing platform used by travel agencies (.NET/C#, React.js, SQL/MySQL, Python, AWS)
- Owned the LIFT Airlines integration end to end, so travel agencies could book LIFT flights through the platform
- Investigated production incidents, mostly flight-detail mismatches caused by airline API data, and shipped hotfixes that handle incomplete data so the same errors stopped recurring
- Handled travel-agency client requests alongside feature work
- Reviewed teammates' code and tested releases before deployment
- Improved backend code and documentation, making the codebase easier to read and work on

PROJECTS

Retail Sales & Inventory Site | *Python, FastAPI, SQLite, Vue.js*

- Builds and maintains a local web app for a multi-brand fashion retailer that turns daily ERP exports into sales, inventory and sell-through dashboards and a weekly owners' report, reusing the existing Python ETL cleaning code so its numbers match the Excel reports

Staff Scheduling Application | *Node.js, SQLite, REST API*

- Built a scheduling app with an auto-fill algorithm, REST API and browser frontend for store shifts and staff assignments

RESEARCH & PUBLICATIONS

A Novel Automatic Definition Selector and Scoring Scheme for the Identification of Filipino Metaphors
Ocampo, L. M., & Clariño, M. A. A. D.
2024 6th International Conference on Computer Communication and the Internet (ICCCI), IEEE · 2024 · DOI: 10.1109/ICCCI62159.2024.10674510

- Primary author of thesis research on NLP-based automatic metaphor identification in Filipino text; independently designed the methodology, implemented the system and wrote the manuscript, with the adviser contributing editorial revisions.

CONFERENCE PRESENTATIONS

ICCCI 2024, IEEE

- Oral presentation of the paper above, ICCCI 2024 (IEEE), to an international audience of academics and industry professionals.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, C#
Frameworks: Spring Boot, Vue.js, React.js, Node.js, .NET, FastAPI
Data: MySQL, DynamoDB, Aurora RDS, SQLite
Cloud (AWS): EC2, Lambda, SQS, KMS, S3, Athena
AI-assisted development: Claude, Cline, prompt design, workflow automation, code review
Practices & tools: REST APIs, Agile/Scrum, Git/GitHub, Postman, Figma, Jira, Confluence
Delivery & leadership: Quarterly/feature planning, cross-team coordination, status reporting, mentoring, documentation

CERTIFICATIONS

AWS Certified AI Practitioner – Amazon Web Services *2025*

AWARDS & RECOGNITION

- Cum Laude, BS Computer Science, University of the Philippines Los Baños (2023)
- DOST-SEI MERIT Scholarship Grantee
