Authorized to work in the Philippines · Available as contractor or via employer of record · No visa sponsorship needed (remote)

SUMMARY

Full stack software engineer with 2+ years building and supporting production systems in Java/Spring Boot, Vue.js and AWS, currently at Samsung R&D and previously on an airline ticketing platform. Builds features across the frontend and backend, handles client and stakeholder requests, and regularly improves manual workflows with AI-assisted automation. Also owns quarterly planning and new-hire onboarding, and works as an associate technical PM / product owner across teams. Strong written English; seeking a fully remote, product-focused role.

SKILLS

Languages: Java, JavaScript, Python, C#
Frameworks: Spring Boot, Vue.js, React.js, Node.js, .NET, FastAPI
Data: MySQL, DynamoDB, Aurora RDS, SQLite
Cloud (AWS): EC2, Lambda, SQS, KMS, S3, Athena
AI-assisted development: Claude, Cline, prompt design, workflow automation, code review
Practices & tools: REST APIs, Agile/Scrum, Git/GitHub, Postman, Figma, Jira, Confluence
Delivery & leadership: Quarterly/feature planning, cross-team coordination, status reporting, mentoring, documentation

EXPERIENCE

Samsung R&D Philippines – Full Stack Software Engineer *2025 – Present*

- Leads a project task force and builds admin-portal features such as carrier certificate management and access control, across a Vue.js frontend and a Spring Boot backend on AWS
- Handles client and stakeholder requests through production debugging and direct database fixes, and regularly analyzes manual workflows and improves them with AI-assisted automation
- Owns quarterly planning, feature scoping and new-hire onboarding; as associate technical PM / product owner, runs meetings, presents reports and coordinates work across teams

Aeronology Philippines Inc – Junior Software Engineer *2023 – 2025*

- Built and extended booking and ticketing features on an airline ticketing platform used by travel agencies, working across a .NET/C# and SQL/MySQL backend, a React.js frontend, Python and AWS
- Owned the LIFT Airlines integration end to end, so travel agencies could book LIFT flights through the platform
- Investigated production incidents, mostly flight-detail mismatches from airline API data, and shipped fixes that handle incomplete data so the same errors stopped recurring
- Reviewed teammates' code, tested releases and improved backend code and documentation

PROJECTS

Retail Sales & Inventory Site | *Python, FastAPI, SQLite, Vue.js*

- Builds and maintains a local web app for a multi-brand fashion retailer that turns daily ERP exports into sales, inventory and sell-through dashboards and a weekly owners' report, reusing the existing Python ETL cleaning code so its numbers match the Excel reports

Staff Scheduling Application | *Node.js, SQLite, REST API*

- Built a scheduling app with an auto-fill algorithm, REST API and browser frontend for store shifts and staff assignments

EDUCATION

University of the Philippines Los Baños – BS Computer Science *2019 – 2023*

Cum Laude · GWA 1.61 (1.0 = highest) · DOST-SEI MERIT Scholarship Grantee

PUBLICATION

A Novel Automatic Definition Selector and Scoring Scheme for the Identification of Filipino Metaphors
